Education

International Institute of Information Technology, Bangalore

July 2023 – July 2025

Master of Science in Digital Society

CGPA: 3.67/4.0

Charotar University of Science and Technology, Anand

July 2020 – May 2023

Bachelor of Science in Information Technology

CGPA: 9.91/10.0

GNFC Narmada Vidyalaya, Bharuch

May 2020

Class XII

Percentage: 62.15

Experience

Junior Software Engineer

August 2025 – Present

Center for Smart Governance

Bengaluru, Karnataka

- Designing and developing **2** interactive BI dashboards using Apache Superset for a statewide digital public service platform in Karnataka, defining **15** KPIs across **10+** administrative datasets to translate complex data into actionable, decision-ready insights.
- Conducting **structured domain research** across public health, welfare programs, and AI in GovTech; applying systems thinking to identify inter-dependencies among programs and institutional workflows, and defining evaluation metrics and analytical questions to assess performance outcomes and systemic interactions.

Business Analyst Intern

January 2025 – July 2025

Center for Smart Governance

Bengaluru, Karnataka

- Developed an **interactive Streamlit dashboard** for a state-level digital public service platform to rank administrative units at district and state levels, enabling performance benchmarking and data-driven operational insights.
- Analyzed large administrative datasets and conducted qualitative research to extract performance insights, validate data accuracy, and design visualizations for institutional performance evaluation.

UX Research Intern

January 2024 – April 2024

Samsung R&D Institute India

Bengaluru, Karnataka

- Led **quantitative and qualitative research** to identify user needs and pain points in cross-device file sharing, conducting structured analysis to uncover behavioral patterns and usability gaps.
- Synthesized research findings and delivered actionable recommendations to the design team to improve file-sharing workflows and user experience.

Projects

Spectrum Auction Price Analysis | *Python, Microsoft Excel, R* | [GitHub](#)

- Compiled and processed spectrum auction data from various governmental telecom agencies, implementing robust data cleaning techniques to ensure accurate analysis.
- Performed panel regression analysis to assess factors influencing spectrum auction prices, leveraging its ability to account for both temporal and regional variations and providing actionable insights that contributed to **3** published news articles.

HastyBuzz | *Figma, User Research* | [Blog](#)

- Conducted comprehensive primary and secondary research to identify key challenges faced by retail stores, leading to a customized platform solution for better product visibility and market reach.
- Developed a user-friendly interface to help retail store owners bring their businesses online, enabling easy product listings and streamlining seamless networking within the community.

WasteNot | *Figma, User Research* | [Blog](#)

- Undertook extensive user research by interviewing and gathering insights from **17** stakeholders, including consumers, recyclers, and NGOs to understand e-waste management in Electronic City, Bengaluru.
- Designed an intuitive and user-friendly UI to seamlessly connect consumers and formal recyclers for responsible e-waste disposal in the city.

Technical Skills

Languages: Python, SQL, R, JavaScript, HTML/CSS

Developer Tools: Apache Superset, Tableau, Git, GitHub, Jupyter Notebook, VS Code, QGIS, Quarto, R Studio

UX Research: User Interviews, Usability Testing, Survey Design, Competitive Analysis, Heuristic Evaluation, Contextual Inquiry, Persona Development, Statistical Analysis, Machine Learning Methods

Achievements/Awards

- Amongst the top **4** students out of over 130 students to get selected for the Undergraduate Student Fellowship at CHARUSAT University.
- Received the Top QA Contributor Award from Mattermost for Hacktoberfest 2022.
- Reached the West Zone Finals of National Inter-college Crossword Expedition 2023 and 2024.
